

The screenshot shows a code editor window with the title "fence\_dimensions.c" and the path "~/Desktop". The code is as follows:

```
1 #include <stdio.h>
2 int main() {
3     double perimeter, length, width;
4     //input perimeter from the user
5     printf("enter the perimeter of the fence:");
6     scanf("%lf", &perimeter);
7
8     //calculate the length and width
9     length = (2*perimeter) / 7;
10    width = (3 / 4) * length;
11
12    //output the results
13    printf(" the length of the fence is: %.2lf\n", length);
14    printf("the width of the fence is: %.2lf\n", width);
15
16    return 0; }
17
```

```
